PERSONAL PROJECTS

WEB Controlled Multi-Purpose Security Robot
- The aim of this project is to develop a prototype of a Smartphone-controlled robot car that performs various functions in order to provide a very powerful and versatile robot while also reducing hardware usage as much as possible.

Fire Detection And Alerting System
- The main objective of this socially relevant project is to design and integrate the Internet of Things (IoT) into an Arduino-based fire safety system that gives alerts to fire-fighting facilities, authorities, and building occupants.
