PROJECTS

Home Automation Based On IOT

- Duration: Feb 2020 - Mar 2020
- Role: Leadership

The project aims at designing an advanced home automation system using a normal web server and wi-fi technology. The devices can be switched ON/OFF and sensors can be read using a personal computer. The field of automation is blooming and these systems are having a great impact on human beings. Designed a user friendly and a safe system control home appliance especially aimed to aid the elders and handicapped.
