WORK EXPERIENCE

Software Intern at MyNextFilm

Nov 2020-Mar 2021

- Writing reusable, testable, and efficient code
- Design and implementation of low-latency, high-availability, and performance applications
- Integration of user-facing elements developed by front-end developers with server side logic
- Coordinate with internal teams to understand user requirements and provide technical solutions

PROJECT

Shopping website: Developed a shopping website by using python, Django, Bootstrap, Html, CSS, and SQLite and JavaScript. In this website user can go through the items mentioned in the shopping website. User can add any item of their choice and there is no limit for it. User can track their order by just simply mentioning the order ID and email ID registered. User can contact us if they have any query. User can search any item mentioned in the website easily.
